Content Outline

Frida Kahlo

I want to build this site with an intro home page and a tool bar to navigate among the pages running across the top or bottom of the entire site, I would like the site to be very colorful and visual, featuring a lot of images and artwork.

Intro
I want this page to be rather bare, with just a brief description of who she is and an image.

Biography
     Artwork
     Personal Life

Paintings
I would like this page to be very image heavy, almost like a gallery of her work, with maybe a feature where if you mouse over an image, a description of the painting pops up.

Modern Day
I want this page to focus on her modern day impact on art and culture. I want to showcase some parodies of her work and items with her face on it.
